

NICKOLAY MARTINEZ

UX/UI Designer | Product Designer | Front-End Oriented Design

nickolay.martinezd@gmail.com · Bogotá, CO · [Portfolio](#) · [LinkedIn](#) · [Behance](#)

PROFESSIONAL PROFILE

UX/UI Designer with 2.5+ years of experience designing scalable, accessible digital products for web platforms and SaaS environments. Proven ability to lead end-to-end UX processes — from qualitative research and usability testing to high-fidelity prototyping, design systems and developer handoff. Distinguished by a technical foundation in front-end development (React, HTML/CSS) and data management (SQL, C#), enabling direct and effective collaboration with Angular and full-stack engineering teams. Experienced in Agile/Scrum workflows and committed to delivering consistent, WCAG 2.1 AA compliant interfaces grounded in real user data.

PROFESSIONAL EXPERIENCE

UX Designer

Dec 2024 – May 2025 | Oct – Dec 2025

[Wikimedia Colombia](#) — Bogotá, CO

- Led end-to-end UX design for a knowledge-access web platform: user research, information architecture, wireframes, high-fidelity prototypes in Figma and developer handoff — reducing design review cycles by ~30% through a structured, component-based design system.
- Conducted 12+ semi-structured interviews and stakeholder workshops to identify usability gaps; redesigned the main user flow, improving task-completion rate in moderated tests from 58% to 81%.
- Executed two rounds of usability testing (expert review + target users), documented error patterns and delivered redesigns implemented before launch.
- Maintained an iterative design system (components, variants, design tokens) ensuring visual consistency and WCAG 2.1 AA compliance across all screens.
- Automated dataset extraction from Wikidata using SQL and C# in Unity, reducing interface data-load times from 8 s to under 2 s — coordinating technical constraints directly with the development team.

UI/UX Designer Jr.

Nov 2022 – May 2024

[Cepheus Games](#) — Bogotá, CO

- Designed web and product interfaces for two shipped titles — from initial research to final asset delivery — contributing to a 20% faster release cycle by implementing a reusable component library in Figma.
- Conducted user research (surveys, internal A/B tests) to inform UI decisions; findings directly shaped menu architecture and visual identity for both launched products.
- Built and maintained the company's visual design system and product identity, ensuring brand consistency across all digital touchpoints.
- Participated in interface QA, validating design specs against final implementation before each release, working in close collaboration with the front-end development team.

AI Data Annotator & UX Evaluator

Jan 2026 – Present

[Micro1](#) — Bogotá, CO (Remote)

- Evaluate generative AI models (image and video) applying UX criteria: usability, visual coherence and output quality — deepening understanding of AI-driven visual decision-making.
- Integrated AI tooling into daily design workflow: Gemini for research synthesis and behavioral hypothesis generation; GitHub Copilot in VS Code for interface prototyping support and code automation.

FEATURED PROJECTS

Creatify — SaaS Dashboard Design Concept — 2025

[UI/UX](#) · [Figma](#) · [2-Day Sprint](#)

Designed a minimalist SaaS dashboard for creative professionals to organise multimedia ideas, replacing flat document editors with a dynamic, non-linear workspace. Delivered complete Figma prototype with sidebar navigation, smart tagging system, and collaborative canvas — demonstrating UX patterns directly applicable to B2B portals and enterprise software: information hierarchy, system states, onboarding flows and responsive layout. → nickolaymd.github.io/Nickolay-Martinez/Design-Concept/creatify.html

Memorial Interactivo 6402+ — Data-Driven UX — 2025

[UI/UX](#) · [Unity/C#](#) · [SQL](#) · [Wikidata](#)

End-to-end design and development of an interactive data experience visualising 6,402+ victims using Wikidata as the source of truth. Managed complex information architecture, iterative prototyping and the tension between data rigour and emotional accessibility. Validated with real users and presented in an academic-institutional context.

G-66 — Web Game with Complex UX System — 2024

[UI/UX](#) · [Figma](#) · [C#](#) · [Unity](#)

Designed complex user flows, interaction systems and a reusable UI component library applying product and SaaS-transferable UX principles: onboarding, visual hierarchy, system states and user feedback loops.

SKILLS & TOOLS

Design & Proto.	Figma (Auto Layout, Components, Variants, Design Systems, Dev Mode, Prototyping), Wireframing, High-Fidelity UI, User Flows, Responsive Design, WCAG 2.1 AA
Research	Semi-structured interviews, moderated & unmoderated usability testing, stakeholder workshops, findings synthesis, A/B testing
Front-End Dev.	HTML/CSS (intermediate), React, JavaScript (basic), C#, SQL (MS SQL Server), Unity Engine, Node.js (basic)
Dev Collaboration	Angular component & state comprehension, design-to-code handoff, design spec documentation, UI QA
Analytics	Google Analytics, Hotjar (in active learning), Tableau (basic), user behaviour metrics
Project Mgmt.	Jira, Notion, Trello · Agile/Scrum, Kanban, Design Thinking, Lean UX
AI Tools	Gemini (research synthesis, UX hypothesis generation), GitHub Copilot / VS Code (UI development support)
Other Tools	Adobe Suite, Storybook (design tokens integration — basic), WordPress, Sketch (basic)
Languages	Spanish (native) · English (upper-intermediate, B2)

EDUCATION

Interaction Design

Aug 2021 – May 2025

[Universidad Jorge Tadeo Lozano — Bogotá, CO](#)

- Training in UX Research, User-Centred Design, UI Design, Videogame Design and case study methodology.
- Capstone project: Memorial 6402+ — full research, design and development of a data-driven digital experience.
